6. Course Methodology

Enrolled students will be involved with work stations and stimulated clinical situations with a certified BLS instructor to complete the skills course. The instructor led programme, with support of didactic lectures and videos, will ensure that the participants learn to recognise potential life-threatening emergencies and initiate immediate chest compressions with ventilations on dummy models for both single rescuer and team BLS. The course will help the participants to perform BLS in clinical and road side scenarios for emergency care.

Participants would also learn to identify common medical emergencies and provide for emergency care till definitive help reaches the patient.

7. Course Syllabus

Basics concepts of BLS
: adult / Pediatric BLS
: Medical emergencies"

The above is circulated to all faculty members and concerned students of Santosh Dental College & Hospital for their information and necessary action.
