

JOINT MEDICAL HOLDINGS

QUALITY COST EFFECTIVE

PRIVATE HEALTHCARE GROUP

WHO WE ARE

The Joint Medical Holdings Group is ranked as one of the largest independent healthcare providers in South Africa, employing top personnel to deliver quality and cost-effective private healthcare to the province of Kwazulu - Natal.

WHERE DID OUR JOURNEY BEGIN

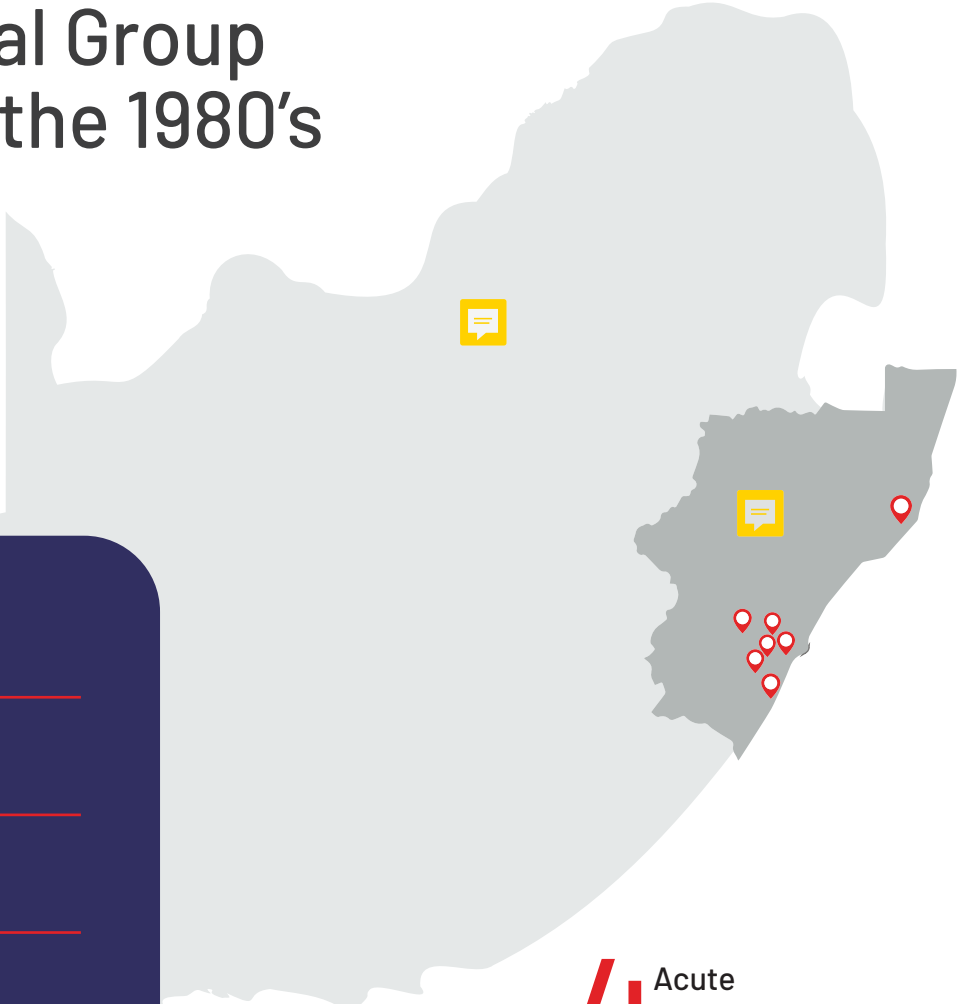

Joint Medical Holdings was established almost 40 years ago in the 1980's, by a group of doctors who wanted to provide accessible healthcare to disadvantaged communities during the apartheid years. By overcoming obstacles such as the Group Areas Act and with no defined roadmap to follow, the Group started its flagship facility, Isipingo Hospital, providing superior medical care to the local community.

Today the Joint Medical Holdings Group includes a total of seven healthcare facilities operating across the province.

Private Hospital Group established in the 1980's

• 820 Beds 

Ascot Park Hospital
87 Beds

OUR VALUES

For our patients

We respect the dignity of an individual and particularly the right to life and are dedicated to the restoration of health by providing patient care in an efficient manner.

For our doctors

We are committed to giving them top quality service in a professional manner and to provide them with modern technology.

For our staff

We recognize that our staff is our greatest asset and we are committed to building an atmosphere of trust, and to train and develop them to their fullest potential.

For our shareholders

We are committed to providing them with a fair rate of return on their investment and to act with integrity, transparency and responsibility in our business dealings.

For our environment

We will act in a responsible manner towards our physical and social environment.

Mr Mvuzo Yengwa

The respect and care that they have given my dad is very much appreciated. Even though their work can be difficult and challenging at times, they go the extra mile in terms of assisting patients and their families. Surely they are exemplary to all the people in your sector.

ISIPINGO HOSPITAL

Y. A. Bolel

We were completely blown away by the amazing level of care and professional service that we received from each and every member of staff at Isipingo Hospital. From the emergency room to high care, to the Paediatric Ward, and the Lancet lab too. Dr Moodley and Sister Wendy helped us in the emergency room and took care of us straight away.

JMOSPITAL

Greg Jones

At every stage of the day, I encountered only people who were friendly, considerate, compassionate and extremely professional and above all else I was especially impressed at how pervasive this positive attitude and demeanour was throughout the entire facility.

RIBUMEDOSPITAL

Mrs. Aamina Dassu

What an awesome visit I had yesterday. Felt like more of a holiday. It was so nice to be checked on every 10 or 15 minutes, so I didn't feel forgotten.

RIBUMEDOSPITAL

RICHARDS BAY MEDICAL INSTITUTE

Radiation Oncology Unit

Richards Bay Medical Institute was opened to assist cancer patients throughout the Zululand region of Kwazulu-Natal. Renowned South African oncologists, Dr Smitha Abraham and Prof Arno Jordaan, joined the team as the only two oncologists serving the entire region.

This all-inclusive facility consists of 40 sub-acute beds, 25 day-surgical beds, a chemotherapy unit, a radiology unit, and a radiation oncology unit. Patients who use Richards Bay Medical Institute have access to chemotherapy, radiation therapy, day surgeries and general oncology treatment. This means that patients no longer have to travel all the way to Durban for treatment.

Alongside the unique cancer treatment services and esteemed oncologists on the team, the hospital boasts another unique offering – a Varian Truebeam Linear Accelerator. This high-tech equipment was installed as soon as construction of the facility was completed in 2013. At the time, it was the first Varian Truebeam Linear Accelerator to be installed on the entire continent, and it remains the only one of its kind in Zululand. This advanced technology makes it possible to deliver radiation treatment to cancer patients quicker, and with much higher accuracy and precision.

The facility also houses a treatment machine which is integrated with advanced technology to enable image-guided radiotherapy (IGRT) with enhanced speed and accuracy. Other radiotherapy services for cancer treatment include 3D conformal radiotherapy, intensity-modulated radiotherapy, volume-modulated radiotherapy, electron beam radiotherapy and stereotactic radiation therapy.
